

# CIVIL TRAIN

The Training Division of the CCF

## Environmental Awareness For Civil Construction Projects

(Developed by DTEI for all  
construction projects)

### Course Objective

This course will provide construction workers with the knowledge to identify environmental issues associated with their activities and best practice methods to minimise environmental impact. It will also outline environmental legal obligations relevant to construction activities.

### Elements

- Recognise possible environmental impacts and damage resulting from the individual's work activities on construction projects
- Identify accepted current environmental management best practices for individual workplace activities
- Identify situations which require further advice about appropriate work practices to minimise environmental damage

### Target Group

Employees who work on road construction projects whose activities may impact on the environment.

DTEI Construction Contracts require at least 2 people on site to have undertaken this training.

### Pre Requisites

Nil

### Qualification

Statement of Achievement

### Participants

10-14 participants

### Course Duration

8 hours

**1 South Road THEBARTON SA 5031**
